

# AUTOMOTIVE ENGINEERING INDUSTRIES

## Advantage of our continuous casting machine

### **Links & Rollers**

- 10mm thick gives good strength Comparing to others,
- Rollers are hardened, this prevents lessening
- maintenance free

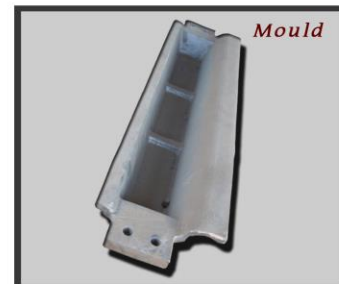

### **Sprocket**

- 20mm thick gives good strength and load bearing capacity
- Maintenance free

### **Mould**

- Excellent over lapping design
- Over lapping model to avoid spillage of metal
- SG Iron mould to for excellent strength
- Easy ejection of ingot
- Extra strength and maintenance free

### **Hammering System**

- Auto hammer helps to ejection ingot easily from mould
- Speed of the hammer works according to the speed of conveyor

# **AUTOMOTIVE ENGINEERING INDUSTRIES**

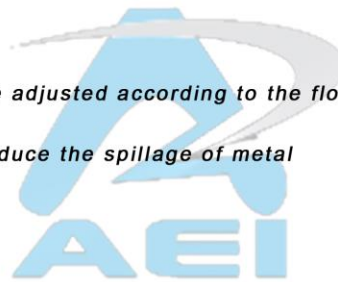

## **Advantage of our continuous casting machine**

### ***Motor and Gear Box***

- ▶ ***Quality and branded motor and gear box***
- ▶ ***Gear box and motor are properly design according to the requirement***
- ▶ ***Motor and gear box can be placed according to requirement***

### ***AC Drive***

- ▶ ***Speed of the conveyor can be adjusted according to the flow of metal***
- ▶ ***Speed adjustment helps to reduce the spillage of metal***

### ***Structure***

- ▶ ***Structure of frame are designed for extra load bearing capacity***
- ▶ ***Structure are designed as the machine can be extended at any time***
